

SPECIALLY FOR  
ALFALFA / LUCERNE

**MOL LUCERNE** is a liquid fertilizer formulation for foliar application of macro and microelements to correct or prevent deficiencies of nitrogen not nitric, Boron, Molybdenum, Iron and Zinc. For solving deficiencies, the efficiency is immediate since nutrients are applied directly in the leaves instead of absorbing it from the roots.

### MOL LUCERNE:

Replenishes nutrients lost through multiple cuttings.

Increases levels of crude protein and total digestible nutrients.

Increased disease resistance.

Faster recovery after cuttings.

Better winter hardiness.

Increased number of cuttings and yield.

**MOL LUCERNE** encourages the formation of root system providing the plant force and longevity.

### COMPOSITION

	% w/w
Organic matter:	30%
Total Nitrogen (N)	8%
Phosphorus (P <sub>2</sub> O <sub>5</sub> )	5%
Potassium (K <sub>2</sub> O)	10%
Boron (B)	1%
Molybdenum (Mo)	0,2%
Iron (Fe)	1%
Zinc (zn)	0,2%

### DOSAGE AND APPLICATION

**FOLIAR APPLICATION:** 300-400 cc/100L H<sub>2</sub>O

Generally used during the vegetative cycle, according to needs and development.

Put 1/3 to 2/3 of total desired water volume in tank. Add adjuvant(s) if desired and agitate until thoroughly mixed. Add pesticide(s) if desired and agitate until thoroughly mixed. Add desired amount of **MOL LUCERNE** and agitate until thoroughly mixed. Fill tank with remainder of desired water. A jar test is good field practice for evaluating compatibility o multiple chemical mixtures. Caution: Check compatibility with chemical mixtures and high phosphate and alkaline (high pH) solutions.
