

# KELOM S SULFUR FERTILIZER

COMPOSITION	% W/V
Nitrogen (N) :	16%
Sulfur (SO3) water soluble	86,4%
pH:	7,5-8,2
Density	1,33 g / cc

## CHARACTERISTICS

SULFUR is a key element for plant growth and development being a important constituent of enzymes and amino acids involved in photosynthesis and protein formation.

**KELOM S** is a liquid fertilizer based in Nitrogen and Sulfur, wich is at high concentration. KELOM S is used as Sulfur source in the prevention of this deficiency. Also improves availability of Iron and Manganese in the soil due to reducing pH. In the combination with herbicide (Glyphosate, Oxyfluorfen, MCPA, Paraquat,...) acts as an enhacer, increasing their speed of action.

- **SULFUR DEFICIENCIES CORRECTOR**
- **FUNGICIDE ACTION (Powdery Mildew and Oidium)**
- **IMPROVES AVAILIBLITY OF IRON AND MANGANESE**
- **INCREASE SPEED OF ACTION OF HERBICIDES.**

## DOSES AND APPLICATIONS

Most agricultural and horticultural crops including oilseed rape, grass, cereals, sugar beet, brassicas and potatoes.

FOLIAR	L/Ha	ml/100L	APPLICATION
<b>Cereals</b>	10	3000	Apply in autumnsufficient cover, up to 1st node stage.
<b>Grass</b>	10	3000	Apply in spring, 1st spray after firts cut and 2nd spray after 2nd cut.
<b>Oilseed rape</b>	5	1500	Maintenance application early in spring during maximun growth, before stem extension.
	10	3000	Deficiency
<b>Olive</b>	5	1500	Application before flowering
<b>Potatoes</b>	5	1500	Apply when crop meets in row where deficiency confirmed.
<b>Sugar Beet</b>	5-10	1500-3000	Apply form 4 leaf stage to help reduce amino-N levels.
FERTIRRIGATION			
<b>Green House</b>	30-50		
<b>Open Field</b>	50-70		

## PRESENTATION

NON TOXIC
