

# KELOM Ca 14

CALCIUM EDTA CORRECTOR

## CHARACTERISTICS

A 100% Calcium chelate (EDTA) wettable granule formulation to prevent and correct calcium deficiency in wide range crops.

Kelom Ca14 is compatible with most of fertilizers and agrochemical products normally used. Do not mix with very acidic parent solutions (pH<3). A test is recommended before mixing.

Do not apply during flowering nor color fruit change. Do not use by foliar application on plum or apricot trees.

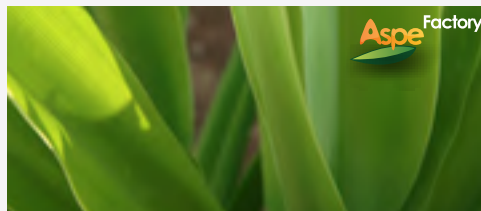

When applied with other EDTA foliar fertilisers products, the combination must not exceed the maximum hectare rate for each individual product for a specific crop

## COMPOSITION

Calcium oxide (CaO)  
EDTA chelated 14 %w/w  
pH (1% in water) 7  
pH stability range 4-9

## APPLICATIONS AND DOSAGE

|  |   |                               |
|--|---|-------------------------------|
| Cereals, Grain Legumes, Oilseed crops, Cotton, Corn, Summer crops            | 0.5-1.5 kg/ha                               | Foliar                        |
| Potatoes and other tuber crops   | 1.0 kg/ha                                   | Foliar                        |
| Vegetables, cucurbits  | 0.5-1.0 kg/ha<br>5-10 kg/ha<br>1-2.5 kg/ha  | Foliar<br>Soil<br>Fertigation |
| Grape vines (wine and table)   | 50-100 g/100L<br>1-2.5 kg/ha                | Foliar<br>Soil                |
| Apples, Nut crops, Citrus, Mangoes, Stonefruit, Avocados, Pineapples, Olives | 50-100 g/100L<br>1-2.5 kg/ha                | Foliar<br>Soil<br>Fertigation |
| Strawberries, other berry crops  | 0.5-1.0 kg/ha<br>5-10 kg/ha<br>1-2.5 kg/ha  | Foliar<br>Soil<br>Fertigation |
| Ornamentals  | 0.25-0.5 kg/ha<br>5-10 kg/ha<br>1-2.5 kg/ha | Foliar<br>Soil<br>Fertigation |
