

# KELOM

## PLANT OIL

## NATURAL OIL

Is a liquid solution to prevent and correct deficiencies, manufactured with plant extracts which supply an excellent coverage and increasing the pesticides application. **It is a useful alternative to mineral oils.**

KELOM PLANT OIL produces a film on the insect to closet the blowhole (opening of the tracheas) producing the death of the insect (white flies, woodlice, others...).

KELOM PLANT OIL can be applied for large range of crops (citrus, vines, olive, tropicals crops, ornamentals, vegetables, etc)

KELOM PLANT OIL is adequate for biological and integral agriculture.

KELOM PLANT OIL don't delay color of the fruits.

KELOM PLANT OIL Is compatible with insecticides, acaricides and fungicides.

KELOM PLANT OIL Can be applied to dry the insect fumagines and prevent subsequent infections.

### COMPOSITION

Citrus Extract 96,8 % w/w

Excipient: 2,3 % w/w

### A USEFUL ALTERNATIVE TO MINERALL OILS

### APPLICATIONS AND DOSAGE

Foliar applications of the growing coinciding with biological infection:

- Woodlice: Citrus – Fruit trees.
- White flies: Vegetables.

Applications during maximum transpiration (at the beginning or at the end of the day).

Foliar application: 0.1 – 0.3% (1 – 3 L each 1000 L)

- Without problems for the crop and environment.
- Natural and biodegradable product.
