STYM 25 is a natural bioactivator based on Amino acids obtained through enzymatic processes, making STYM25 more efficient than chemical process based products. It is recommended for all crops and all times, especially when the plants need more nutrients such as in pre-floration, setting, the swelling of the fruit, vegetative growth, for saline or climatic conditions etc. Agrícola Aspe has developed a group of molecules that we call I.S.I. capable of acting as DISEASE RESISTANCE ACTIVATORS.
