

# STOP Fruit

## PLANT GROWTH REGULATOR

**STOP Fruit:** The product is completely soluble in water, which affects the processes related to fruit abscission. The abscission occurs by formation of several layers of specialized cells that ensure the connection between the fruit and plant. Auxin (STOP Fruit) promotes abscission when applied immediately after fruit set, but, if applied later, its effect is to delay fruit abscission preventing fruit drop.

**STOP Fruit** is licensed for clearing of apple fruit, and apple and pear trees to prevent fruit drop.
