LAMIPROTECT

Natural defenses
Stimulator

LamiProtect SL It is a highly concentrated extract solution from LAMINARIA, a variety of seaweed extracted from the Atlantic Ocean. This product is manufactured under optimum conditions to preserve natural polymer structure of organic compounds.

LamiProtect SL stimulates the defenses of crops.
Strengthens its resistance against pathogens.

Composition:

Organic Matter	25,5 % en w/w
Potassium K ₂ O	4,0 % en w/w
Laminaria extract	45 g/l
pH	4.2

- STRAWBERRY OIDIUM.
- FIRE BLIGHT IN APPLE AND PEAR.
- APPLE SCAB.

- NATURAL DEFENSES STIMULATOR.
- HARMLESS FOR MAN AND THE ENVIRONMENT.

DOSES AND APPLICATION: (FOLIAR)

DOSES	APPLICATION PERIOD	Minimum period between the last treatment and harvest.
• STRAWBERRY OIDIUM		
0,70 L/Ha 0,075 L/Hl	Every 10 days, from the beginning of vegetation	Does not exist
• FIRE BLIGHT OF APPLE AND PEAR		
0,70 L/Ha 0,075 L/Hl	1st Application, at the stage of green buttons (D3). Make the last application to drop of the last petals (H). Continue applications if there is post-bloom infection. Maximum number of applications: 7	Does not exist
• APPLE SCAB		
1 L/Ha 0,1 L/Hl	Every 10 days, at the beginning of the period of secondary contamination. <i>LamiProtect SL</i> is used against apple scab during the secondary contamination. Is applied during periods of medium risk. In periods of high risk of contamination; successive rainfall for at least 18 hours and up to 25 mm, apply a specific fungicide against apple scab.	Does not exist
