# FLOWER 50

FLOWERING

## CHARACTERISTICS

**FLOWER 50** provides Phosphorus immediately assimilated by the plant. **Especially indicated in the stages of pre-flowering, flowering and setting fruit.** Improve the Health Status of the crops, power the root system and increases resistance to stress.

It can be used as a source of Phosphorus in citrus, fruit, vegetables, ornamental, vine, plant nursery, etc., especially when deficiency symptoms occur as a result of an excess of lime active on the soil.

Phosphorus (P) is essential for all known life forms, because it is a key element in many physiological and biochemical processes.

Component of each cell in all organisms, Phosphorus is essential and cannot be replaced by anything else. **Phosphorus is the nutrient that most influences the development of flower and fruit.**

## COMPOSITION

%w/v

Phosphorus ( $P_2O_5$ )	50,0
Free amino acids	2,0
Total Organic Nitrogen (N)	0,4

Density	1,4
pH	5 - 6

Applying **FLOWER 50** in flowering, you get:

- **Improve the training and opening of the flowers**
- **Facilitate the work of pollinating insects**
- **More and better fruits**

APPLICATION	DOSE
<b>Foliar</b>	<b>100 - 200 c.c/Hl</b> 1-2 L/Ha
